

Breakthrough

Breakthrough is an onboarding programme that will both support you and stretch you during your first 6 months with us.

Welcome

We want you to feel at home here from day one. Upon arrival, you will receive a welcome kit that will help you get started. Your kit will include

a first-week schedule, 'go-to' information, your breakthrough schedule and some goodies too! Each item represents a different part of what makes us unique - our culture. We are agile, driven and we pull in the one direction. We can't wait to welcome like-minded people to our team!

Only the beginning

Breakthrough is only the beginning of your professional development with us. As a company we actively encourage continued professional development and because we are so fluid as a company, there are always opportunities to advance and take on new challenges.

Becoming certified

To 'breakthrough' you will complete a series of tasks, detailed in your programme. When you have completed each element, the relevant Departmental Manager will sign off the task. The aim is to gain experience of other departments as well as your own. At the end of your first 6 months you will become certified but this is only the beginning of your CDEnviro journey.
